At the same time, the rawness of the air in the morning and evening is liable to start you wheezing and barking.

Perhaps you think you dare neglect a cough at this season. It never pays to neglect health. Nature never forgives or forgets.

## THE OWOSSO TIMES. TWELVE PAGES.

EDMUND O. DEWEY, Editor.

OWOSSO, FRIDAY, NOV. 19, 1897.

The October report of the national banks of the county show individual deposits in those banks alone to be \$253,000,000 greater than those of October, 1896.

The old state of Maryland has gotten a long way from the "solid South." Time was when she was counted a charter member of that organization.

What has become of the three U. S. Senators who went boldly forth to discover why Japan fell into the hands of the "money power" and abandoned the silver standard?

The comparison between the railroad earnings and the bank clearances at the present time and one year indicates an astonishing change in the business of the country.

The republican strength in the south continues to grow year by year and congress by congress. The 56th congress will have the largest southern republican representation in history.

It is thought at Washington that the administration is looking to an early reopening of negotiations for the adoption of an arbitration treaty between Great Britain and the United States.

Bradstreet's Review says that in spite of the less active trade of October due to yellow fever scares, quarantines, etc., the aggregate total for that month was greater than even September's immense total, making the heaviest month's total since January, 1893. It may be remembered that Mr. Bryan, on a cool October day, stated that the first six months of McKinley's administration was the most disastrous in the history of the country.

The amount of beet sugar produced in Germany during the current year is estimated at 1,790,000 tons, a slight decrease from 1896, when the yield was 1,821,000 tons. For Austria-Hungary the yield is placed at 823,000 tons, against 927,000 tons last year, while France shows an increase, 751,000 tons against 703,000 tons last year. These enormous figures are interesting to Americans, for they show the vast importance to which beet sugar production will soon be brought in our own country under the fostering care of a wise protective system. The development of this industry in the United States means countless millions of dollars to the farmers, countless millions kept at home which are now sent abroad to pay for foreign sugar.

That great business improvement has come to the country since last July is conceded by all intelligent observers; and that this is due largely to the passage of the Dingley tariff must also be conceded. What may be the operations of the new tariff, the restoration of confidence brought about by its passage put into operation millions of dollars which had theretofore been lying idle, and that gave employment to hundreds of thousands of hands. It caused the country to undergo a change such as had never before been witnessed by many of the present generation, idle factories and furnaces to start into new life, and the hum of industry to sound from state to state. The new tariff is likely to warrant the confidence placed in it, as its revenues are satisfactorily increasing month by month, and it will be but a short time when the treasury will have a monthly surplus instead of a deficit, as has been the case for the last four years.

### How One Industry Helps All Others.

The development of the beet sugar industry in the west is furnishing a new and profitable line of trade for machinery builders. This industry is not only bringing capital into Wisconsin, California, Nebraska, Colorado and other states, and adding to the value of the property, but it will give employment to many people in an industry which is destined to reach a remarkable development within the next two or three years. It is stated that capitalists are willing to furnish from \$500,000 to \$1,000,000 to invest in factories and refineries, to be established in parts of Colorado especially adapted to the raising of sugar beets. Already one enterprise is starting up with sugar refining machinery and general equipment representing a \$1,500,000 investment. It is this side of the question that is interesting iron and steel men. With the expansion of the sugar beet industry, not only new machinery but new inventions will come into requirement.—Chicago Journal of Commerce.

It is stated that the reduction in insurance rates which has just gone into force throughout the state will save policy holders from \$300,000 to \$100,000 annually, the average cut being at least 15 per cent.

The official canvass in Ohio shows Gov. Bushnell's plurality to be 23,100. The republicans have a majority of five in the legislature, not counting the republicans elected on fusion tickets. Compared with the vote of a year ago, when Maj. McKinley had 51,000 plurality, the republicans lost 100,000 votes and the silverites 75,783.

### Bleeding Kansas.

Kansas, "bleeding Kansas," exuding prosperity at every pore, shows a gain of 8,000 in the republican vote. The wind that has wafted over fields that have been golden with dollar wheat, blew right straight through the whiskers of populism on election day.—Lansing Republican.

### Not Strengthened.

Although Nebraska was carried by the complete fusion of the democrats, populists, and free silver republicans, the majority of last year was reduced, and the prestige of William Jennings Bryan was certainly not strengthened.—Lansing Republican.

### Washington Letter.

Special Correspondence:

WASHINGTON, D. C., Nov. 15, 1897.

The political Mark Tapleys in the democratic party are complacently announcing that they are well satisfied and really encouraged by the "gains" which they made in the late election.

Well, it is a good thing to be easily satisfied, a very good thing. But it may not be a bad plan to really look the field over, now that the smoke of battle has cleared away, and see just what has happened, and whether it is the democrats or the republicans who have made substantial gains.

One of the most important, in fact the really important, results of the election was its effect on the senate, and if any democrat can find any "gains" there, or any cause for happiness, he will be entitled to a 16 to one silver medal. It is now apparent that no less than seven of the thirty-four democrats in the senate are morally certain to be succeeded by republicans, and still another—Lindsay, of Kentucky—who is equally certain to be laid on the shelf, his place taken, however, by a free silver democrat. Four of the democratic senators who will step down in March, 1899, are Roach, of North Dakota; Turpie, of Indiana; White, of California, and Mitchell, of Wisconsin. Although states did not hold elections which form the basis of this conclusion, the elections of this month, however, may be said to have signed the death warrants of Gorman, of Maryland; Smith, of New Jersey, and Murphy, of New York. Mr. Gorman's successor will be elected this coming winter, and is sure to be a republican. The other two, Edward Murphy, Jr., of New York, and James Smith, Jr., of New Jersey, each has one more chance at the bat; but, judging from the results on the legislatures of their respective states, both are doomed to be succeeded by republicans in 1899. Thus it will be seen that there are probably six democratic senators who will give place to republicans at that time, three certain, and as it only takes a change of two to give an easy control to the republicans, the favorable result to that party is apparent.

The senate today stands 43 republicans, 34 democrats, 5 silver republicans, 6 populists, 1 Independent (Kyle, of South Dakota), and 1 vacancy from Oregon.

Of the 30 senators who will retire March 3, 1899, 11 are republicans, 15 democrats, 2 silver republicans, and 2 populists. The 11 republicans retiring are Aldrich (R. I.), Burrows (Mich.), Clark (Wyo.), Davis (Minn.), Hale (Me.), Hanna (Ohio), Hawley (Conn.), Lodge (Mass.), Proctor (Vt.), Quay (Pa.), and Wilson (Wash.). Ohio's election made certain the return of Mr. Hanna, and of the remaining ten all save Clark, of Wyoming, and Wilson, of Washington, and there is good reason to believe that both of these will also be re-elected.

Fifteen democrats go out in 1899: Bate, of Tennessee; Cockrell, of Missouri; Daniel, of Virginia; Faulkner, of West Virginia; Gorman, of Maryland; Gray, of Delaware; Mills, of Texas; Mitchell, of Wisconsin; Money, of Mississippi; Murphy, of New York; Pasco, of Florida; Roach, of North Dakota; Smith, of New Jersey; Turpie, of Indiana, and White, of California. Mr. Gorman's fate has already been determined. A republican will come from Maryland to the senate in his place, and last week's election in New Jersey indicates clearly that a republican will succeed Mr. Smith. These two changes will offset the possible republican loss already referred to. Tennessee, Missouri, Virginia, Texas, Mississippi, and Florida will continue to be represented by democrats, reducing the certain democratic membership to twenty-five. That West Virginia, Wisconsin, North Dakota, and California will send republicans to the next senate no one who is in touch with the trend of events doubts.

These, with the republican gain in Maryland and New Jersey, will increase the republican membership to forty-seven. The belief here is that Delaware will send a republican to succeed Gray if the republicans in that little borough do not tangle themselves up, as they did two years ago in the Addicks-Higgins fight. If present conditions continue, Indiana republicans are confident they will elect Turpie's successor. Indiana is an industrial state, and with the improvement in her industries, due to a republican administration, there should be no question about the complexion of the legislature she will elect next year. In New York it is believed one year of Tammany will secure a republican legislature and give Platt a republican colleague in the senate.

It is thus perfectly apparent that the result of the present "democratic gains" was to absolutely assure the control of the senate to the republicans.

### Circuit Court.

The calendar for the November term is an unusually light one, there being but 57 cases noted for trial.
